

## The Wangari Maathai Institute shares its expertise with the researcher- March 13, 2017

*From the left Prof. N. J. Muthama, Deputy Director, Wangari Maathai Institute, Dan Teng'o and Prof. H. M. Mutembei, Director, Wangari Maathai Institute*

Dan Teng'o pays a courtesy call to the Wangari Maathai Institute for Peace and Environmental Studies to seek its input on research on Kenyan media coverage of climate change on March 13, 2017. He held his interview with Prof. N. J. Muthama, the Deputy Director whose research experience is, among others, in the area of Air quality, Climate and climate change. Prof. Muthama's current focus is specifically aimed at providing scientifically founded quantitative answers to the basis for predictions of regional climatic variations and of changes in the frequency and severity of extreme events, especially over Africa, and their impacts on the Environment.
